PROGRAM INDEX TO VOLUME 55

Atomic physics

Dyall, K.G., I.P. Grant, C.T. Johnson, F.A. Parpia and E.P. Plummer
GRASP (Fortran, 94872 cards). GRASP: a general-purpose relativistic atomic structure program — ABJN 55 (1989) 425

Computational methods

Park, S.C. and J.P. Draayer
BBTREE (Fortran, 659 cards). Balanced binary tree code for scientific applications — ABJR 55 (1989) 189

Surguladze, L.R. and F.V. Tkachov
LOOPS (Reduce, 663 cards). LOOPS: procedures for mulitloop calculations in quantum field theory for the REDUCE system — ABJO 55 (1989) 205

Grotendorst, J.
LEVIN (Maple, 879 cards). MAPLE programs for converting series expansions to rational functions using the Levin transformation. Automatic generation of FORTRAN functions for numerical applications — ABLG 55 (1989) 325

Chen, Y.-M., A.E. Koniges and D.V. Anderson
0001 ILUBCG2-11 (Fortan, 872 cards). ILUBCG2-11: Solution of 11-banded nonsymmetric linear equation systems by a preconditioned biconjugate gradient routine — AALX 55 (1989) 359

Gorishny, S.G., S.A. Larin, L.R. Surguladze and F.V. Tkachov
MINCER (SCHOONSCHIP, 3707 cards). MINCER: program for multiloop calculations in quantum field theory for the SCHOONSCHIP system — ABJQ 55 (1989) 381

Computer algebra

Kaneko, T. and S. Kawabata
SPROC (Fortran, 6626 cards). A preprocessor for FORTRAN source code produced by REDUCE — ABLB 55 (1989) 141

Grotendorst, J.
LEVIN (Maple, 879 cards). MAPLE programs for converting series expansions to rational functions using the Levin transformation. Automatic generation of FORTRAN functions for numerical applications — ABLG 55 (1989) 325

Condensed matter physics and surface science

Reid, J.S. and G.J. Milne
DIANA88 (Fortran, 5061 cards, manual 17 pages). Quasi-elastic X-ray scattering divergence analysis calculation — ABJK 55 (1989) 91

Data bases and data compilation

Park, S.C. and J.P. Draayer
BBTREE (Fortran, 659 cards). Balanced binary tree code for scientific applications ABJR 55 (1989) 189

Electrostatics and electromagnetics

Janse Van Rensburg, D.J. and D.A. McNamara
CAROT VERSION 3.0 (Pascal, Screen, 10762 cards, manual 64 pages). An interactive computer-graphics-based processor for boundary element modelling of electromagnetic scattering by thin conducting wires ABJL 55 (1989) 457

Elementary particle physics

Persson, S.
VERSION LUND/10/88 (Pascal, 4778 cards, manual 37 pages). Measurement and three dimensional reconstruction of particle tracks in emulsion chambers ABJI 55 (1989) 103

Kaneko, T. and S. Kawabata
SPROC (Fortran, 6626 cards). A preprocessor for FORTRAN source code produced by REDUCE ABLB 55 (1989) 141

Ganssauge, E., B. Dressel, S. Hackel, H. Kallies, E. Koch, Ch. Müller, J.T. Rhee, W. Schulz and K. Ständecke
EMUFIT VER. 4.1 (Fortran, 7444 cards). A track reconstruction program (TRP) for evaluation of nucleus–nucleus collisions in nuclear track emulsion chambers ABFU 55 (1989) 233

Tobimatsu, K. and Y. Shimizu
RABHAT (Fortran, 6281 cards). Radiative Bhabha scattering in special configurations with missing final e^+ and/or e^- ABLC 55 (1989) 337

Fluid and gas dynamics

Das, P.
KINPACK (Fortran, 1549 cards). Computer programs for the Boltzmann collision matrix elements ABJS 55 (1989) 177

Molecular physics

Carbó, R. and B. Calabuig
MOLSIMIL-88 (Fortran, 2643 cards, manual 11 pages). MOLSIMIL-88: molecular similarity calculations using a CNDO-like approximation ABJG 55 (1989) 117

Tennyson, J. and S. Miller
TRIATOM (Fortran, 2934 Cards). A program suite for the calculation of ro-vibrational spectra of triatomic molecules ABJW 55 (1989) 149

Tennyson, J. and S. Miller
SELECT (Fortran, 2152 cards). A program suite for the calculation of ro-vibrational spectra of triatomic molecules ABJX 55 (1989) 149

Tennyson, J. and S. Miller
ROTLEVD (Fortran, 3994 cards). A program suite for the calculation of ro-vibrational spectra of triatomic molecules ABJY 55 (1989) 149

Tennyson, J. and S. Miller
DIPOLE (Fortran, 2619 cards). A program suite for the calculation of ro-vibrational spectra of triatomic molecules ABJZ 55 (1989) 149

Tennyson, J. and S. Miller
SPECTRA (Fortran, 938 cards). A program suite for the calculation of ro-vibrational spectra of triatomic molecules ABLA 55 (1989) 149

Davie, K. and R. Wallace
GJVGEN (Fortran, 1666 cards, manual 7 pages). Orthogonal generalized Jacobi cooridinates for *N*-body systems ABJJ 55 (1989) 463

Nuclear physics

Catchen, G.L.
ACOEFF (Fortran, 1403 cards). Perturbation functions: PAC probe nuclei, $I = 2, 5/2$, and 3 ABJM 55 (1989) 85

Mustafa, M.M., M.W. Kermode and E.S. Zahran
NPSD (Fortran, 955 cards). Solution of the two-nucleons Schrödinger equation with nonlocal tensor potential in the $^3S_1 - ^3D_1$ state ABJH 55 (1989) 109

Etchegoyen, A. and M.C. Etchegoyen
GARDEL (Fortran, 4057 cards). Microscopic inelastic form factors for heavy-ion reactions ABJE 55 (1989) 217

Etchegoyen, A., M.C. Etchegoyen and E.G. Vergini
TBINT (Fortran, 1478 cards). Evaluation of Hamiltonian two-body matrix elements ABJF 55 (1989) 227

Talwar, I. and L.E. Wright
RADTAIL (Fortran, 2968 cards). The radiation tail accompanying elastic electron scattering from the atomic nucleus ABJV 55 (1989) 367

Plasma physics

Glasser, A.H. and K. Smith
POS (Fortran, 3141 cards). POS – a 1D time-dependent H^+ ion source code ABJU 55 (1989) 409
